Amelia Johnson

Completed

34, Female | Visit: 15 Oct 2023, 10:30 AM | Service: Laser | Dr. Evelyn Reed

Diagnosis

Patient presents with mild rosacea and slight inflammation on the cheeks. No signs of pustules or papules. Recommending a gentle skincare routine.

Doctor Notes

Patient is responding well to previous treatments. Skin texture has improved. Continue monitoring for any adverse reactions. Discussed sun protection methods.

Diagnosis

Patient diagnosed with moderate inflammatory acne on the facial T-zone.

Doctor Notes

Prescribed a course of topical treatment. Advised on a gentle skincare routine. Patient reports sensitivity to benzoyl peroxide. Will start with a lower concentration of salicylic acid. Follow-up in 4 weeks to assess progress.

Treatment Session Info

Body Area	Shots/Units	Session Results	Next Session
Face	N/A	Initial redness reduced	12 August 2024

Prescription

Medication	Dosage	Frequency
Salicylic Acid 2% Cleanser	Apply thin layer	Twice daily
Clindamycin Phosphate 1% Gel	Pea-sized amount	Once daily (PM)
